

Wireless temperature sensor

Product number: 7051005

Configuration: white

Configuration options

7051005 | white

✓ Exhaust air accessorie

The wireless temperature sensor is integrated into the radio system of the window contact switch. Here, the temperature of the operating state of the fireplace is monitored. The window only needs to be opened with the fireplace in operation while the hood is active. Thus, the strict coupling of the active hood and open window is not necessary. The temperature sensor is suitable for installation in closed and dry living areas.

- model PT 1000
- Ø 5 mm
- length 100 mm
- temperature range -50–500 °C
- sensor cable 2000 mm, up to 450 °C
- the wireless temperature sensor (7051005) can be combined with the wireless switch 7051001 or 7051002
