- ✓ Cleaning agent
- ✓ 0,5 l

Our stainless steel sinks with high-gloss surface are manufactured with great care and using state-of-the-art manufacturing and processing technology. The stainless steel applied for this is subject to strict quality control and ensures a constant high quality level of the sinks.

The material properties of stainless steel 18/10 – according to the current state of the art – exclude absolute scratch-proofing. Therefore, the occurrence of small scratches is normal. Only after regular care using the recommended stainless steel system care, will you achieve a semi gloss surface after about 2–4 weeks.

**Note**  
When cleaning, make sure that the stainless steel surface is not processed against the grain!
