Design meets precision: ARMATE® SERVIZIO Namor®

Stainless steel faucets for the highest requirements

With the Namor® series, in the premium ARMATE® SERVIZIO portfolio, Naber underlines its commitment to stainless steel faucets which combine exquisite design, technical sophistication and long-lasting quality. All models bear the Naber logo and stand for excellent manufacturing expertise and the highest material quality.

Manufactured from high-quality 304 stainless steel, the faucets are available in three attractive finishes: classic stainless steel, matt black powder-coated and elegant shimmering gunmetal PVD-coated. The three model lines offer a wide range of design options for modern kitchen concepts. For added convenience, the Namor® 2, 4 and 6 models are equipped with a pull-out shower hose.

All Namor® high-pressure faucets are equipped with a laminar jet regulator as standard. This generates a soft, clear flow with no splashing, low noise and reduced water consumption. Their integrated Cold-Start technology also supports more conscious energy use in everyday kitchen routines. A smooth-running quality cartridge with ceramic discs ensures precise control and long-term functionality.

With a swivel range of 120°, the faucets offer generous freedom of movement at the sink. Connection hoses with a length of at least 700 mm make installation easy. Naber underlines its quality claim with a five-year manufacturer's warranty (excluding wearing parts) and its own factory customer service in Germany, Austria and the Netherlands.

The series also offers clever solutions for special installation situations:

Press release · p. 2 / 2

for front of window solutions, the Namor® 1, 3, 4 and 5 models are available as window faucets. Designed to be removable, they allow the window behind the sink to be opened easily, which is ideal for compact kitchens. The models Namor® 1, 3 and 5 have a convincingly low installation height of the faucet base with a tilted height of only 25 mm and thus provide for additional planning freedom.

For kitchens with under-sink water tanks, Naber also offers the models Namor® 1, 3, 5 and 7 as low-pressure faucets. When connected to a cold water valve and a pressureless under-sink appliance, they guarantee a convenient decentralised supply of cold and hot water.

The Namor® kitchen faucets are complemented by new detergent dispensers in three colours, which meet the highest standards in terms of stylish design, ease of use and technical features.

Namor® faucets combine first-class design with sophisticated functionality – making every kitchen task a pleasure.
