

# Giro radio remote control

Product number: 7051033
Configuration: white

**Configuration options**
7051033 | white

✓ Remote control
✓ 220–240 V

GIRO is a wireless radio remote control with a replaceable battery, two buttons and a central indicator light. For switching transformers, power supplies and lights connected to a GIRO receiver (7051032) on and off. The remote control enables the lights connected to the power supply unit, which are in turn connected to the receiver, to be switched on and off. GIRO also allows configurations with multiple control units (up to 3), with the control units operated by more than one radio remote control (up to 9).
— wall-mounted transmitter with a range of 10 m
— black remote control
— replaceable battery
