

PRIME flow GREENflow filter box

Product number: 4043075
Configuration: grey

Configuration options
4043075 | grey
4043097 | black matt

✓ Filter box
✓ simple maintenance/access

Recirculating air filter system for filtration of cooking vapours when using a downdraft hood/hob ventilator.
— high flexibility in the positioning of the filter boxes
— suitable for base heights from 100–150 mm (grid can be shortened)
— guide vanes provide for uniform distribution of the air flow
— suitable for almost all common downdraft hoods/ hob ventilators, with or without own activated carbon filter
— simple maintenance/access
— integrated base foot (optionally usable, load capacity up to 300 kg)
— aerodynamically optimised blades of the ventilation grid (anodised aluminium) minimise the pressure loss
— maximum outlet cross-section provides for barely perceptible air movement

Note:
The GREENflow OMEGA filter needs to be ordered separately if required.
For good ventilation results, the use of at least two boxes is recommended.

Technical data

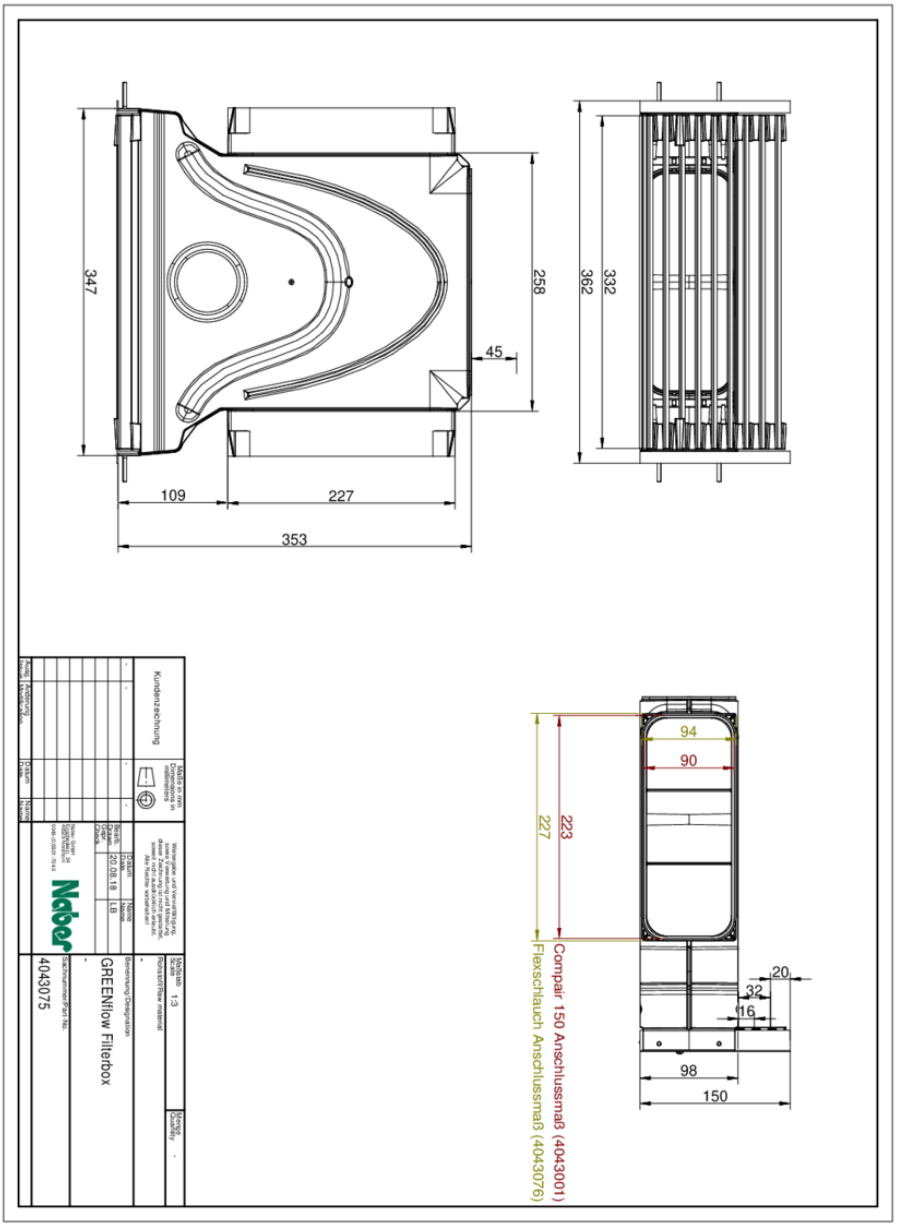

Article type	Filter box
Brand	PRIME flow
Height	100 - 150 mm
Width	353 mm
Properties	flexible
Note	The GREENflow OMEGA filter needs to be ordered separately if required. For good ventilation results, the use of at least two boxes is recommended. aerodynamically optimised blades of the ventilation grid (anodised aluminium) minimise the pressure loss maximum outlet cross-section provides for barely perceptible air movement
Further	suitable for base heights from 100–150 mm (grid can be shortened) integrated base foot (optionally usable, load capacity up to 300 kg)

Suitable for	suitable for almost all common downdraft hoods/ hob ventilators, with or without own activated carbon filter
Shape	angular
Outer diameter	150 mm
System dimension	150
Ventilation system	COMPAIR PRIME flow®
Maintenance	simple maintenance/access
